Professional Summary

Full Stack Developer with 8+ years of experience delivering web applications, back-office systems, REST APIs, database-driven platforms, and automation solutions using C#, .NET, ASP.NET Core, Blazor, JavaScript, and SQL Server. Strong background in full software development lifecycle work including requirements analysis, application development, maintenance, modernization, integration, testing, and production support. Experienced in migrating legacy MVC applications, building greenfield business systems, and delivering scalable, production-ready solutions for finance, lending, healthcare, utility, and education environments.

Core Skills

Primary Stack	C#, .NET, ASP.NET Core, MVC, Razor Pages, Blazor, JavaScript, HTML, CSS, SQL Server
Frontend	Blazor, React, Vue, Angular, jQuery, Bootstrap, Tailwind, responsive web development
Backend	ASP.NET Web API, REST APIs, Node.js, Express, microservices, authentication, business logic implementation
Data & Storage	Microsoft SQL Server, MySQL, PostgreSQL, SQLite, MongoDB, Cosmos DB, relational and NoSQL databases
Platform & Automation	Power Platform, UiPath, Active Directory workflow automation, AI-assisted development
Engineering Practices	Application maintenance, legacy modernization, greenfield development, debugging, testing, production support
Additional Languages	PHP, Python, VB6, Visual Basic, C, C++

Selected Delivery Areas

- Delivered full stack software solutions across lending, back-office management, finance, healthcare, utility operations, and school administration.
- Modernized and maintained legacy .NET and MVC applications while also building new web and desktop platforms from the ground up.
- Integrated REST APIs, database-driven workflows, and automation tools to improve operational reliability, maintainability, and delivery speed.

Selected Projects & Platforms

- Back Office, Lender, and Loan Applications:** Built business applications from the ground up using full stack development practices to support internal operations, lender workflows, and loan processing.
- MVC to Blazor Modernization:** Led migration of legacy ASP.NET MVC applications to Blazor to improve maintainability, usability, and long-term platform support.
- Education and Automation Systems:** Delivered school monitoring and administrative applications with Power Platform and UiPath automations for employee profiling, payroll scheduling, Active Directory, and license management.
- Open Source and Portfolio Work:** Contributed to DigiByte and Digi-ID related platforms and maintained public developer work through GitHub and a live portfolio site.

Professional Experience

Full Stack Developer	2024.4 – Present
AgileTechOps Inc.	

- Maintain and manage existing desktop and web applications, providing application support, issue resolution, enhancements, and stable day-to-day operations.
- Lead migration of legacy ASP.NET MVC applications to Blazor, improving maintainability and aligning systems with modern .NET development practices.
- Implement business requirements across frontend, backend, API, and database layers, translating operational needs into production-ready software solutions.

- Built new applications from the ground up for back-office management, lender workflows, and loan processing, supporting core business operations.
- Apply AI-assisted development approaches to accelerate implementation, improve troubleshooting, and strengthen delivery efficiency.

Full Stack Web / Power Platform Developer

2023.5 – 2024.4

Innovior Inc.

- Developed full stack web applications for university and school clients, including systems for course and subject monitoring and related administrative workflows.
- Built and improved automation solutions for employee profiling, payroll scheduling, Active Directory processes, and license management using Power Platform and UiPath.
- Contributed across frontend, backend, API, and database layers to deliver business solutions that streamlined client operations.
- Supported implementation, testing, issue resolution, and release readiness to maintain stable delivery for client-facing systems.

Software Developer

2017.6 – 2023.4

Shang Software Solution Inc.

- Helped build back-office applications used to manage company operations and financial workflows.
- Integrated payment and transaction solutions through vendor APIs including Alipay, Help2Pay, WeChat, and related providers.
- Maintained and improved core systems, application workflows, and integrations to support reliable releases and uninterrupted business operations.

.NET Developer

2015.9 – 2017.6

Veridata Network Inc.

- Contributed to the development of a Clinic Management System using ASP.NET, C#, Microsoft SQL Server, and Web API.
- Supported delivery of healthcare-related application and database functionality using Microsoft technologies.

Earlier Experience

2011.6 – 2015.9

Multiple Roles

- **Selectbytes Inc.** Maintained and updated production client applications, including projects for RMIA and Weld Australia.
- **CTFS:** Maintained and enhanced the Aperia Mall system for a Singapore-based client.
- **Camarines Sur IV Electric Cooperative:** Developed in-house systems for warehousing, HR, accounting, collection, and billing.
- **iServe Customer Solution Management:** Contributed to enterprise systems for accounting, inventory, sales, and operational monitoring.

Education

Bachelor of Science in Information Technology

2006 – 2010

Camarines Norte State College

Bachelor of Science in Computer Science

2005 – 2006

Mabini Colleges
